Metal Medic 2016

(7305)

Water Displacing Rust Inhibitor

INCREASING PROFITABILITY THROUGH SOLUTIONS-DRIVEN CHEMICAL TECHNOLOGY

Description:

Metal Medic 2016 is a non-emulsifiable, water-displacing rust preventative formulated for use on metal surfaces following machining or cleaning operations. Designed to leave a non-staining, ultra-thin protective film, it also contains a fingerprint neutralizer to guard against handling-related corrosion. Metal Medic 2016 quickly displaces water and coolants from metal surfaces, allowing displaced fluids to settle at the bottom of the tank for easy removal. In addition to removing residual moisture, it deposits a uniform, corrosion-resistant barrier that protects metals during storage or further processing. Its clean performance and reliable protection make it ideal for use in a wide range of industrial and manufacturing environments.

Applications:

Optimum results will be obtained by dipping parts in solution of Metal Medic 2016. However, spray application is satisfactory if coverage is complete. Product may be heated to 130 F to penetrate and reduce film thickness.

PRODUCT PROPERTIES

Form	Liquid
Appearance	Clear Tan Liquid
Odor	Mild
pH	N/A
Specific Gravity	0.796 - 0.816

PACKAGING CONFIGURATIONS

- 5 Gallon Pails
- 55 Gallon Drums
- 275 Gallon Totes

STORAGE & HANDLING

- Packaged in Polyethylene Containers
- Store Inside at Room Temperature in Original Container
- Standard Chemical Handling Practices
- Shelf Life of ~2 Years in Sealed Containers

See SDS for complete safety recommendations.
