Metal Medic 7306

Water Displacing Rust Inhibitor

INCREASING PROFITABILITY THROUGH SOLUTIONS-DRIVEN CHEMICAL TECHNOLOGY

Description:

Metal Medic 7306 is a non-emulsifiable, water-displacing rust preventative formulated to protect metal surfaces after machining or cleaning operations. It features a fingerprint neutralizer to prevent corrosion caused by handling and leaves a thin, non-staining protective film. Metal Medic 7306 rapidly displaces water and coolants, allowing separated liquids to settle at the bottom of the tank for easy removal. In addition to removing residual moisture, it forms a uniform, corrosion-resistant barrier that helps preserve metal parts during storage, transport, or further processing. Its clean performance and effective protection make it well-suited for industrial metalworking environments.

Applications:

Optimum results will be obtained by dipping parts in solution of Metal Medic 7306. However, spray application is satisfactory if coverage is complete. Product may be heated to 130 F to penetrate and reduce film thickness.

PRODUCT PROPERTIES

Form	Liquid
Appearance	Clear Amber Liquid
Odor	Mild
pH	N/A
Specific Gravity	0.819 - 0.839

PACKAGING CONFIGURATIONS

- 5 Gallon Pails
- 55 Gallon Drums
- 275 Gallon Totes

STORAGE & HANDLING

- Packaged in Polyethylene Containers
- Store Inside at Room Temperature in Original Container
- Standard Chemical Handling Practices
- Shelf Life of ~2 Years in Sealed Containers

See SDS for complete safety recommendations.
